

Consolidated Syllabus Statements

This document captures a wide-range of issues and resources that may be relevant to your students. Feel free to use these statements as they are or modify them as needed. Consider including them in the traditional syllabus and/or within the course Canvas site, for example. Further, some of these statements may be more appropriate for some modalities (i.e., Face-to-Face or Online) than others and will be identified as such.

Classroom Protocols/Academic Contingency Plans

Academic Contingency Plan for Academic Technology Outage [all modalities]: In case of an academic technology outage, please follow the university website for updates. Please check your SJU email for additional updates.

Procedures for Inclement Weather [F2F]: Depending on weather conditions, if faced with unsafe travel conditions, SJU may delay our opening, in which case we will provide detailed instructions at [sju.edu/status](https://www.sju.edu/status). Or, SJU may declare a virtual work and learn day. SJU will communicate this information through text, email, phone call, the website and SJU Safe. To ensure you are signed up for these notifications, [download SJU Safe](#) and update your cell phone number in the Nest.

Virtual Learn Day Policies [all modalities]: Classes will not meet face-to-face. Faculty will determine which virtual option will best meet instructional goals for each class — synchronous or asynchronous — and will be responsible for communicating through Canvas to students. Students should follow the guidance of their field placements, service learning and clinical sites regarding attendance.

Students With Disabilities [all modalities]

Reasonable accommodations are provided to eligible students by the Office Student Disability Services (SDS). For more information, please contact SDS at sds@sju.edu or 610.660.1774, or visit the website at www.sju.edu/sds.

Class Recording [all modalities as applicable]

Be advised that by taking this course, you consent to some or all class sessions being recorded by the instructor (and in some cases with assistance from the SJU Office of Information Technology).

Class Recordings: Recordings are intended to focus on the instructor, but the voices and/or likenesses of other individuals in the class may also be recorded. Video and/or sound recordings will be stored at a secure SJU video management platform for two years and will be used or distributed only for educational or academic purposes, e.g., to allow for remote learning for those students not physically present in class or unable to attend a synchronous online class session.

Zoom AI Companion: When synchronous online sessions or virtual meetings are conducted, the instructor may enable the [Zoom AI Companion](#) to generate meeting summaries, action items, or automated transcriptions to support your learning. If the Zoom AI Companion is enabled for a class session, all participants must acknowledge and agree to the AI Companion disclaimer upon entering or remaining in the meeting to stay active.

If you have questions about the use of such technology or if you do not consent to being recorded, you must discuss and resolve your concerns with your instructor before the end of the drop/add period.

Discrimination, Harassment & Retaliation [all modalities]

SJU is committed to providing an educational and employment environment that is free from acts of discrimination and harassment based on protected characteristics, including sexual harassment, and from retaliation for engaging in protected activity. We encourage anyone who has experienced this type of harm to seek help from the University by filing a report through the [incident reporting form](#), or by calling 610-660-1145.

For information about SJU's response to reports of discrimination, harassment or retaliation, including definitions of prohibited conduct, information regarding confidential reporting options on- and off-campus, and resources for support, please visit <https://www.sju.edu/offices/titleix-equity> or contact titleix@sju.edu / bias@sju.edu.

While I want you to feel comfortable coming to me for support, please know that certain reporting requirements are part of my job responsibilities at Saint Joseph's University. I am required to make mandated reports of allegations of prohibited conduct, meaning that if I learn of any incident of possible discrimination, harassment or retaliation, I am required to report it to the Office of Title IX & Equity Compliance. If you wish to speak to someone confidentially, please visit <https://www.sju.edu/offices/titleix-equity/resources/confidential> for a list of confidential resources.

Academic Honesty [all modalities]

General Statement on Academic Honesty for Syllabi

Note: Faculty are strongly advised to explicitly discuss academic honesty with their students and advise their students of their sanctioning practices at the beginning of each semester and at the end of add/drop.

The University exists primarily to sustain the pursuit of knowledge. Learning, to have true value, must be linked to a sense of honesty and integrity. It is the responsibility of every person in the academic community —faculty, students, administrators— to ensure that dishonesty is not tolerated. Personal and communal integrity have always been fundamental in Jesuit education, and a sense of honor must be kept alive in every activity at Saint Joseph's University.

Academic integrity and ethical behavior serve as the bedrock of the university community, providing a framework within which learning can flourish. To this end, SJU expects its students, its faculty, its administrators, and its staff to uphold the highest

standards of academic integrity. SJU expects all members of the SJU community to both honor and protect one another's individual and collective rights.

The [SJU Academic Honesty Policy](#) is published both in the Student Handbook and in the University Catalog. It is a student's responsibility to understand this policy. In this course, the standards of academic honesty as set forth in SJU's Academic Honesty Policy will be strictly enforced. All work completed, both in and out of the classroom, including all types of homework assignments, essays, quizzes, exams, projects, research papers, lab reports, etc., must be a student's own original work. When in doubt, or if there are questions about maintaining academic honesty or the SJU Academic Honesty Policy, a student should check with the instructor for more information regarding appropriate ways to seek help in their course. According to the Academic Honesty Policy, academic dishonesty of any kind (including plagiarism, cheating, unauthorized use of external sources or Artificial Intelligence, etc.) will result in the instructor filing an Academic Honesty Violation Report that could lead to a range of sanctions including, but not limited to, failing an assignment, receiving a course grade letter reduction and/or an "F" for the course, and possibly suspension or expulsion from the university. For more information on plagiarism and how to avoid it, visit the [SJU Writing Center](#). For more information on Academic Integrity, consult the Academic Integrity Council (**forthcoming**).

Customizable content:

1. If desired, each instructor should add any department/program/course/assignment-specific information regarding implementation of the academic honesty policy (ex: specific examples of course-related actions an instructor might want to highlight as academic honesty violations, or, if applicable, cross-references to any policies on professional probation or suspension of experiential learning). NOTE: If an "F for the course" as a potential sanction for violation of the Academic Honesty Policy is not specifically mentioned in the course syllabus, course honesty requirements, assignment instructions, or other prominent written location, use of application of that sanction may be subject to review if challenged by the student.
2. Each instructor/course has their own policy about the use of Artificial Intelligence (AI). See below for relevant information regarding the use of AI in this course: [instructor should add policy on AI use in this course].

Lockdown & Monitoring Technology

Statement re: Respondus LockDown Browser (only) | Click [here](#)

Statement re: Respondus LockDown Browser & Monitor | Click [here](#)

Artificial Intelligence Syllabus Statement [all modalities]

- Since spring 2025, all faculty members are expected to include a syllabus statement on Artificial Intelligence (AI) for each of their courses. However, faculty have the freedom to choose how students will or will not use AI in their courses.
- The two general approaches at the classroom level include a “No-AI” approach and an “AI-Inclusive” approach. A “No AI” approach at the classroom level is when the use of AI tools is prohibited for all assessments/assignments. An “AI-Inclusive” approach at the classroom level is when the instructor authorizes students to use approved AI tools for specific purposes in particular assessments/assignments.
- In addition to the required syllabus statement on AI use in each course, instructors should include an AI statement for individual assessments or assignments, especially if AI use differs among assignments. See below for samples.
- Current synthesis of research on AI in education¹ suggests that clear AI guidelines and open dialogue with students at the beginning of the course can promote academic honesty, reduce students’ feelings of anxiety and confusion about appropriate use of AI in their classes², and reinforce the importance of critical learning in the AI era.
- Research suggests that fostering students’ literacy on AI can support their ongoing growth and development. OTL suggests instructors use this [student infographic](#)³ as a starting point for conversations about generative artificial intelligence.
- **AT THE COURSE LEVEL**, the Office of Teaching and Learning provides examples of AI classroom statements using two approaches:
 - “No AI” approach - when use of AI tools is prohibited.
 - “AI-Inclusive” approach - when university-approved AI tools are permitted for particular use in specific assessments or assignments.
 - You can access additional information from [OTL’s Guide to Artificial Intelligence](#).
- **Sample Syllabus Language on AI.**

¹ Wang, A. H., & Wentzell, G. (2026). [Reflections from the editors: Reimagining learning outcomes through AI-enhanced pedagogy](#).” Journal on Excellence in College Teaching.

² [Silva, E.](#), cited in Brian Alexander, [aiandacademia@substack.com](#), and MIT. (2026). [AI Detectors Don’t Work. Here is What to Do Instead](#).

³ Rutgers-New Brunswick, Institute for Teaching, Innovation & Inclusive Pedagogy. (u.d.) What to know about generative ai: Advice for students.

“No AI” approach is when the use of AI tools is prohibited.

- *According to SJU Academic Honesty Policy, academic dishonesty of any kind (including plagiarism, cheating, unauthorized use of external sources or Artificial Intelligence, etc.) will result in the instructor filing an Academic Honesty Violation Report that could lead to a range of sanctions including, but not limited to, failing an assignment, receiving a course grade letter reduction and/or an “F” for the course, and possibly suspension or expulsion from the university. All students are expected to abide by this policy throughout this course.*

For this course, academic dishonesty, including cheating, plagiarism, and fabrication, including assistance from AI tools, will not be tolerated. Using Gemini, NotebookLM, or any other form of AI to assist in whole or in part to complete graded assignments (e.g., homework, tests, projects, term papers) is considered unauthorized assistance. The penalty for the violation of the Academic Honesty Policy is course failure. If you have any questions about what constitutes academic integrity in this course, please feel free to contact me to discuss your concerns.

“AI-Inclusive” approach is when specific AI tools are permitted for particular use and require prior permission.

- *According to SJU Academic Honesty Policy, academic dishonesty of any kind (including plagiarism, cheating, unauthorized use of external sources or Artificial Intelligence, etc.) will result in the instructor filing an Academic Honesty Violation Report that could lead to a range of sanctions including, but not limited to, failing an assignment, receiving a course grade letter reduction and/or an “F” for the course, and possibly suspension or expulsion from the university. All students are expected to abide by this policy throughout this course.*
- *In this course, the instructor authorizes students to use approved AI tools for specific purposes in particular assessments/assignments. First, students are asked to reflect on the dimensions of communication, transparency, accountability, bias, and privacy for responsible AI use. Please take time to review and acknowledge that you have read and will abide by the class policy below.*
 1. **Communication.** As learners, it is critical that you develop your oral and written voice. Your writing must be effective and logical, and your oral communication should be clear and compelling. While for some assignments, you may use university-supported AI tools to further enhance your voice, AI-generated contributions are not your voice.
 2. **Transparency.** Students need to outline how and why they used/not used university-supported AI tools for specific assignments where AI use is permitted. For this course, it is plagiarism to submit work

produced by AI tools without [attribution](#). Any use of AI must be in alignment with assignment guidelines, and all AI-generated contributions should be [properly cited](#) like any other reference material. AI will not be considered a “scholarly source” for assignments requiring specific types of references. Prohibited use of AI includes using AI to write entire sentences, paragraphs, or papers to complete class assignments. Violations of this rule will result in disciplinary processes under the [SJU Academic Honesty Policy](#).

3. **Accountability.** *Students must [cross-validate the content created by AI](#) against trusted first-party sources. Be wary of misinformation or “hallucinations” by AI tools (e.g., citations to publications or source materials that do not exist or references that otherwise distort the truth).*
4. **Bias.** *Most AI tools are often trained on large, unmoderated bodies of text, such as text posted to the internet, this can result in the production of biased and other unintended content [in various stages of the AI pipeline](#).*
5. **Privacy.** *Avoid sharing high-risk [personal data](#). You should NEVER enter any data or input that is confidential or sensitive into publicly accessible generative AI tools. This includes (but is not limited to) individual names, physical addresses, identification numbers, professor notes/outlines/lectures/powerpoints, among others.*
6. **Student Acknowledgment.** *Each student must complete this portion. Enter your name in this Google sheet [\(ADD YOUR OWN LINK\)](#) to indicate that you have read and will abide by this responsible use of Generative AI policy for this course.*

- **AT THE ASSESSMENT LEVEL**, the Office of Teaching and Learning provides examples of AI assessment statements using the “No-AI” and “AI-Inclusive” approaches:
- A **“No-AI” Assessment approach** works best when instructors are assessing students’ independent mastery using real-time work in a controlled or secure environment. This includes:
 - (a) conducting in-person assessments where AI assistance is not possible, such as written tests under strict supervision,
 - (b) use of methods that test students’ on-the-spot-thinking, like oral presentations/assessments in real-time with structured Q&A, or
 - (c) critical justification essays, where instructors include essay portions in exams where students have to justify their reasons or solutions, focusing on individual logic.
 - This approach works best when students are aware of this approach at the start of the course and before each assessment. Students also know that they need to document the originality of their work throughout the course.

- **Sample No-AI Assessment Statement:**

The purpose of this oral presentation with a structured Q&A [REPLACE WITH YOUR ASSESSMENT] is to assess whether you can explain your choices and respond to counterarguments. You must demonstrate your core skills and knowledge on the spot, without consulting any materials. Any use of AI tools is prohibited. Violations of this rule will result in disciplinary processes under the [SJU Academic Honesty Policy](#). To complete this assessment, each student is given X minutes to explain their choices and respond to counterarguments on the spot, without consulting any materials. To succeed in this assessment, you are required to clearly explain "why," "how," and "so what" questions.

- Additional Resources for No AI Assessment Approach

- [No AI Assignments built to be AI-Resistant](#)
- University of Sydney's (2023) [What to do about assessments if we can't out-design or out-run AI?](#)
- **University of Sydney's (2025, May updated) consolidated and publicly accessible [AI for Educators website](#)
- [Carleton College's Writing Across the Curriculum: AI-Resistant Assignments](#)

- An “AI-Inclusive” Assessment approach works best when instructors assess how the student independently developed their divergent, critical, or creative thinking by critiquing, evaluating, and/or directing AI-generated ideas/content.

- This approach only works when instructors “proactively” ask students to provide a “Responsible AI Use Statement” BEFORE administering the assessment or assigning the work.
- For each AI-inclusive assignment or assessment, students are required to provide a “Responsible AI Use Statement” where they outline their AI usage, specifically addressing ethical considerations and providing relevant documentation. Students may also need training in order to appropriately and effectively interact with an approved AI tool.
- Some examples include AI-enhanced projects where students are asked to present their work-in-progress inclusive of any AI components, by providing a thick description of their innovation and ethical use of AI tools and content. Another assessment example is when instructors ask students to orally explain their process, including AI applications, and ethical use multiple times during the course.

- **Sample AI-Inclusive Assessment Statement:**

The purpose of this reflection paper is to assess how you developed your critical thinking skills [REPLACE WITH YOUR LEARNING OBJECTIVE]. To complete this assignment, you need to write a X-word reflection paper

by answering the provided reflection questions describing how you critiqued, directed, and interacted with an approved AI tool to arrive at a logically coherent, fact-consistent, and personal document. You may use SJU-supported AI tools (e.g., Gemini in Google Workspace, Gemini Notebook) as an assistant. You must provide a “Responsible AI Use Statement” at the end of the paper outlining your AI usage, specifically addressing ethical considerations and providing relevant documentation.

- *For this assignment, it is plagiarism to submit work produced by Generative AI as your own without [attribution](#). Prohibited use of AI includes using AI to write entire sentences, paragraphs, or the final paper to complete the assignment. Violations of this rule will result in disciplinary processes under the [SJU Academic Honesty Policy](#). To succeed in this assessment, you are required to critically reflect on and answer the provided reflection questions. You are required to provide a clear “Responsible AI Use Statement.”*

- [Day of Dialogue](#)

Inclusive Learning Environments (Source: Dr. Cecilia M. Orphan, University of Denver)

In this class, we will work together to develop a learning community that is inclusive and respectful. Our community may include differences in race, color, gender, culture, age, religion, sexual orientation, socioeconomic background, disability, and myriad other social identities and life experiences. The goal of inclusiveness encourages and appreciates expressions of different ideas, opinions, and beliefs, so that conversations and interactions that could potentially be divisive turn instead into opportunities for intellectual and personal enrichment.

This commitment to inclusiveness requires respecting what others say, their right to say it, and the thoughtful consideration of others' communication. Both speaking up and listening are valuable tools for furthering thoughtful, enlightening dialogue. Consistent with SJU's mission, respecting one another's individual differences is critical for an inclusive, collaborative and excellent learning community and is a core expectation for behavior inside the classroom.

Statement on Inclusiveness (adapted from Cornell University)

Consistent with SJU's mission, I am committed to providing an atmosphere for learning that fosters interaction, understanding and respect among all groups within our community. While working together to build this community I ask that we all:

- Recognize that our classroom community represents a rich variety of backgrounds and perspectives.
- Share our unique experiences, values, and beliefs.
- Be open to the views of others.
- Honor the uniqueness of our community.
- Appreciate the opportunity that we have to learn from each other in this community.
- Value each other's opinions and communicate in a respectful manner.
- Keep confidential discussions that the community has of a personal (or professional) nature.

- Use this opportunity together to discuss ways in which we can create an inclusive environment in this course and across the SJU community.

Statement on Respect

Version 1 (adapted from University of South Carolina)

In this time we share together over the semester, please honor the uniqueness of your fellow classmates and appreciate the opportunity we have to learn from one another. Please respect each others' opinions and refrain from personal attacks or demeaning comments of any kind. Finally, remember to keep confidential all issues of a personal or professional nature that are discussed in class.

Version 2 (Source: University of Iowa College of Education)

Consistent with SJU's mission, it is my intent that students from all backgrounds and perspectives be well served by this course, that students' learning needs be addressed both in and out of class, and that the differences that students bring to this class be valued as a resource, strength and benefit. It is my intent to present materials and activities that are respectful of difference, and your suggestions are encouraged and appreciated. Please let me know ways to improve the effectiveness of the course for you personally or for other students or student groups. In addition, please let me know as soon as possible if your observance of a religious holiday conflicts with any class meetings, assignments, or tests or exams.

Chosen Name Guidelines

Version 1 (Adapted from: Dr. Cecilia M. Orphan, University of Denver)

Consistent with SJU's [Chosen Name Guidelines](#), this course recognizes students by their chosen name. The interactive nature of our group work and class discussion makes it vitally important for us to create an educational environment of inclusiveness— this includes using others' names as shared and engaging with each other in a spirit of mutual respect.

Version 2 (Source: Dr. Chris Heasley, SJU)

Consistent with SJU's [Chosen Name Guidelines](#), this course recognizes students by their chosen name. If you need to make an update, instructions for how to do so through the University's systems can be found [here](#).

The interactive nature of our group work and class discussion makes it vitally important for us to create an educational environment of inclusiveness— this includes using others' names as shared and engaging with each other in a spirit of mutual respect.

Inclusive Classroom Commitment (Source: Dr. Becki Scola, SJU)

Consistent with SJU's mission, my goal is that students from all backgrounds and perspectives be well served by this course, and that students' learning needs be addressed both in and out of class. The range of knowledge, opinions, beliefs,

perspectives, identities, and backgrounds that students bring to our class will be valued as a resource, strength, and benefit. It is my intent to present materials and activities that are respectful of differences.

Let's use our class as an opportunity to discuss ways in which we can create an environment of inclusiveness in this course and across the SJU community. Student suggestions are *encouraged and appreciated*. Please let me know ways to improve the effectiveness of the course for you personally or for other students or student groups. And, please know that I expect students to keep confidential our classroom discussions that include any personal (or professional) content. In addition, please let me know as soon as possible if your observance of a religious holiday conflicts with any class meetings, assignments, or tests or exams.

Religious Holidays (Source: Dr. Chris Heasley, SJU)

Version 1: Consistent with SJU's mission, SJU makes all reasonable efforts to allow members of the community to observe their religious holidays, in accordance with SJU policies, responsibilities and applicable law. Students who expect to miss a class meeting, assignment, test or exam due to the observance of a religious holiday should inform their instructor as early as possible – preferably at the start of the semester. Students are responsible for any coursework missed due to the conflict; however, they may arrange with the instructor alternative opportunities to complete academic assignments or schedule make-up test/exams. If a student and their instructor disagree about reasonable alternatives for making up coursework or texts/exams, the student should contact the Office of Title IX & Equity Compliance at 610-660-1145 or titleix@sju.edu.

Version 2: Consistent with SJU's mission, SJU makes all reasonable efforts to allow members of the community to observe their religious holidays, in accordance with SJU policies, responsibilities and applicable law. If you expect to miss a class meeting, assignment, test or exam due to the observance of a religious holiday, please let me know as early as possible – preferably at the start of the semester. While ultimately you are responsible for any coursework missed due to the conflict, we can arrange alternative opportunities to complete academic assignments or schedule make-up test/exams.

Food & Basic Needs

Version 1 : Your well-being is of primary importance to your learning experience. Facing financial challenges such as difficulty purchasing textbooks, accessing technology (laptops or graphing calculators) , securing food, essential hygiene items, or transportation -- may impact your ability to succeed in your courses.

If you are facing any of these hardships, [please complete this form](#), which will be sent to the Students In Need Committee that meets on Wednesdays. A staff member will follow up with you to help you connect you with SJU and/or other resources. For support with food and basic needs, you are encouraged to visit [HawkHUB](#) in person (we are located on all three campuses, with two locations on Hawk Hill) or submit an online order.

Finally, you are welcome to contact me to discuss specific ways in which I can support you. I am committed to helping you succeed.

Version 2 : Saint Joseph's University recognizes that not all students may have access to adequate resources to meet their essential needs. If at any point in the semester you find that your academic performance or overall wellbeing is negatively affected by challenges related to access to class materials, technology, food or hygiene products (e.g., skipped meals and/or unable to buy groceries, etc.), [please complete this form](#), which will be sent to the Students In Need Committee that meets on Wednesdays. A staff member will follow up with you to help you connect with SJU and/or other resources. For support with food and basic needs, you are encouraged to visit [HawkHUB](#) in person (we are located on all three campuses, with two locations on Hawk Hill) or submit an online order.

Finally, you are welcome to contact me to discuss specific ways in which I can support you. I am committed to helping you succeed.

Day of Dialogue

Version 1

ATTEND: 10.28.26 [Day of Dialogue](#)

Mark your calendars for Wednesday, October 28, 2026 and plan to attend at least one session. Please visit the [Day of Dialogue](#) site for more details about the event.

Version 2

We won't be having class on October 28th, because SJU will be holding a Day of Dialogue. This day gives us a chance to focus on SJU's mission of inclusiveness. Please visit the [Day of Dialogue](#) site for more details about the event.

Version 3

Our next Day of Dialogue will take place on Wednesday, October 28, 2026. The Day of Dialogue builds upon SJU's mission of inclusiveness.

No classes will be held on October 28th. Instead, we will participate in the Day of Dialogue which will include practical, participatory, and action-oriented sessions throughout the day. Details of our assignment related to the Day are included on

our Canvas site. Please visit the [Day of Dialogue](#) site for more details about the event.

Office Of Learning Resources [all modalities]

Want to strengthen your approach in this class or fine-tune your learning strategies? The Saint Joseph's University Office of Learning Resources (OLR) empowers students to make a smooth transition to the university and to hone their skills in order to study more efficiently and effectively. For course-based support, they offer undergraduate-level peer tutoring in a wide range of subjects. If you are an undergraduate or graduate student seeking to strengthen your learning strategies (time management, textbook reading, test taking, etc.), they offer one-on-one appointments with professional staff members. Most services are free, unless otherwise noted, and online students may access services via Zoom. The OLR is located in Bellarmine G10. For more information or to make an appointment, please visit their website at www.sju.edu/learning.

Writing Center [all modalities]

The Saint Joseph's University Writing Center is free to all members of the SJU community. The undergraduate and graduate student writers who make up the staff can assist you in any stage of the writing process, from brainstorming to organizing and developing your ideas, to citing sources to proofreading. They work with writers from across the university on a variety of assignments and individual and group projects: lab reports, business policy papers, poems, essays, research papers, dissertations, resumes, and personal statements for graduate school applications, among many others. You name it; they've helped writers write it.

Both in-person (Hawk Hill) and synchronous online [appointments](#) (all three campuses) are offered any time the Writing Center is open. Asynchronous eTutoring appointments, with a 24-hour turnaround time for feedback, are also available to writers at all three campuses for assignments that are seven pages or fewer. Writers who wish to work with the same tutor at the same time/day throughout the semester can also sign up for the [Writing Partnership Program](#). For more information, including hours of operation, instructions on how to make an appointment, and other workshops and events, please visit the SJU Writing Center website at sju.edu/writingcenter or follow them on Instagram @sjuwrites.

Health & Well-being [all modalities]

Saint Joseph's University recognizes that one's health and well-being strongly impact one's ability to do well in school and in life. As a result, there are many helpful campus resources designed to help students care for themselves in a holistic way. Students may experience stressors that can impact both their academic experience and their personal

well-being. These may include academic pressure and challenges associated with relationships, mental health, alcohol or other drugs, identities, finances, etc. All of us benefit from support during times of struggle and challenges. If you are experiencing concerns, seeking assistance sooner rather than later is a courageous thing to do for yourself and those who care about you. Visit [sju.edu/wellbeing](https://www.sju.edu/wellbeing) to learn more about the Nine Dimensions of Well-being (physical, emotional, intellectual, occupational, social, cultural, environmental, spiritual, and financial). The resources below can help you to cope with stress and to achieve your academic and personal goals.

Counseling and Psychological Services (CAPS) provides free and confidential mental health counseling for all full-time, degree-seeking Saint Joseph's University students at Hawk Hill and University City. Additionally, brief consultation and referral support is provided for all students enrolled at the Lancaster location, and for part-time students at Hawk Hill and University City. CAPS therapists are available for goal-focused individual and group counseling services; for consultation with faculty, staff, and other students; for outreach programming; and for mental health emergencies. To access services or for more information, please call CAPS at 610-660-1090 Monday through Friday between 8:30 am - 4:30 pm, or email caps@sju.edu. For access to services at Lancaster, please call 610-660-1090 or email CAPS-L@sju.edu.

In addition to CAPS daytime services, counselors are available after office hours, on weekends, and during holidays to attend to emergency mental health concerns for Philadelphia-based students. To access emergency on-call services, Philadelphia students should call 610-660-1090 and select option "2" when prompted, or dial 9-1-1. Lancaster students should call the Lancaster County Crisis Intervention Team at 717-394-2631, or dial 9-1-1. Please visit the CAPS website at [sju.edu/caps](https://www.sju.edu/caps) for more information.

Behavioral health is a key part of your overall well-being. A brief screening is the quickest way to determine if you should connect with a behavioral health professional. CAPS offers the CCAPS-Screen, an anonymous mental health screening instrument that assesses some of the most common psychological problems experienced by college students. To complete the screening, visit the [SJU CCAPS-Screen website](https://www.sju.edu/ccaps-screen).

Collegiate Recovery Program (CRP): SJU's [Collegiate Recovery Program](#) is a supportive, inclusive community for students in recovery from Substance Use Disorder (SUD). The CRP also offers a space for Allies of Recovery to collaborate in breaking the stigma around SUD and to create a recovery friendly campus community. All are welcome and encouraged to inquire about the CRP, especially those who are in recovery from SUD, have been affected by SUD, or are looking to explore their behaviors/relationship with substances. The CRP offers a community space and Recovery Residence, an on-campus housing option for those in recovery from SUD who prefer to live in an abstinence based community environment. For more information, contact recovery@sju.edu or visit sju.edu/CRP. .

Technology Requirements And Skills [all modalities as appropriate]

Technology Requirements

Here are the recommended hardware/software requirements for students:

Device: You will need a standard laptop or desktop computer running Windows 11 and above or the latest MacOS update. A tablet, smartphone, or Chromebook will not provide the access and functionality necessary for SJU coursework. Memory should be 8GB or higher (RAM); Hard Drive 256GB or higher; for additional computer specifications, visit our [Knowledge Base](#). Students will need regular access to their computers. The Office of Information Technology does not recommend Chromebooks or tablet devices as your primary device.

Browser: Chrome is the recommended browser when accessing Canvas, SJU's learning management system. Firefox and Microsoft Edge may also be used, but may not give students the best experience. You are likely to experience issues using Safari with the Canvas learning management system.

Peripherals: A built-in or external microphone and webcam are necessary. Headphones or a headset are not required, but may be useful.

Internet: It is highly recommended that you have a high-speed broadband connection. Your Internet connection should be stable and fast enough to support Zoom video meetings, email, chat, and other day-to-day learning tasks. 10-20 Mbps for upload and download speeds are considered fast enough for academic activities. A good way to test your ability to conduct a Zoom meeting is by [joining a test Zoom meeting](#) from your location. You may also [test your speed here](#). Please keep in mind that other devices on your network will impact your speed (e.g., if a family member is streaming Netflix or playing online games).

Software: [Microsoft Office Suite](#) is recommended and is available to all students at no cost. Other software may be needed based on major or course.

Support: The Office of Information Technology provides [drop-in open support sessions](#) to students. Students can ask questions about Canvas, Zoom, or any academic technology in a safe and supportive environment.

Other useful information can be found in the [Knowledge Base](#).

Technology Skills Requirements

In order to succeed in any online course, you need to have a certain level of computer skills, motivation, and commitment to learning on your own. Starting with the first week of class and each week thereafter, it is your responsibility to access and use all digital media presented in this course. If you experience technical problems, it is your responsibility to contact the [Technology Service Center](#) as soon as possible so any outstanding issues can be resolved quickly and completely. Be sure to get a support ticket number related to the problem that you reported for future reference and proof that you reported the problem.

Maintaining all technical requirements to fully participate in this course is mandatory. This includes having a reliable Internet connection and a functioning microphone headset, as well as keeping software up-to-date needed for test taking. Quizzes that are not completed because of an interrupted Internet connection will not be reset. Please test your technology as a preparation step for exams. In addition, you must be able to effectively use online resources, such as navigating websites, downloading documents, and viewing different multimedia.

Syllabus Statement On Student Attendance [all modalities as appropriate]

Attendance and participation are essential for learning. Therefore, attendance is required for all in-person classes and synchronous online sessions. Unexcused absences are likely to result in course penalty; more than **XXX** unexcused absences may result in a grade of FA (Failure due to Absence) for the course.

Land Acknowledgement

Saint Joseph's University courses are taught in buildings that reside in the present and ancestral homeland of the Lenape (len-AH-peh) people, Lenapehoking (len-AH-peh-HO-king), which they inhabited for over 10,000 years prior to European imperial colonization. The Lenape people embrace the values of collaborative use of land, peaceful resolution of conflict, respect for people of diverse backgrounds, and, as the continuing stewards of Turtle Island, a deep reverence for the natural world.

[add when appropriate] This course dedicates itself to advancing teaching materials and class practices that honor and uplift Lenape and other Indigenous knowledge and practices.

Community Standards

The Office of Community Standards supports SJU's mission through the education and administration of policies and expectations designed to promote a safe, respectful, inclusive, and welcoming environment, in which all students can learn, grow, and become moral leaders in their communities. The Office of Community Standards encourages all students to reflect on what it means to be a Hawk, on and off campus, and understand the impact and harm their individual decisions and actions can have on others.

To support the continuation of a positive, safe, and educational setting, SJU has adopted an array of policies, rules, regulations, and expectations. Should any member of the SJU community violate an established policy, rule, regulation, or expectation, the University has in place processes intended to educate and hold accountable those in violation and deter further violations by that and/or other individuals. For more information, please refer to the Student Handbook or email communitystandards@sju.edu or visit sju.edu/communitystandards.

Career Readiness Competencies

This course supports your growth in key [Career Readiness Competencies \(CRCs\)](#) that are essential for success in academic settings and as you progress from college to career. Through course activities, assignments, discussions, or group work, you will develop and strengthen career readiness skills in varying degrees.

By participating fully in this course, you will not only deepen your understanding of the subject matter but also build a foundation of transferable skills that will benefit you in any career path you choose.
